

# SOM Baseball Utilities Change Log

Link to latest version: <https://www.netplaybaseball.com/download/download-2024a.php>

## Feb 18, 2024

### New

Team League Stats:

Displays team detail stats for all teams in league.

### Updates

Pitchers From Box Scores:

Added link to box score.

Added notification for relief pitchers appearing in 3 consecutive days or games.

Player W-L Count When Starting:

Player names now sorted by last name. Also saving inputs like team, etc.

Comparison Report:

Players not displayed are not counted in team totals.

Fixed error for players not used in replay.

Added print page breaks after each team.

Fixed data when only team totals are displayed.

## 2023c – October 3, 2024

### New

Identify Missing BOX and PAC Files:

Identify BOX and PAC files, for completed games, that do not exist in a folder.

Used to identify files that did not successfully download from the Cloud.

### Updates

Build Game Record Book:

Fixed Load Input Data error.

Pitchers From Box Scores:

Fixed error when reporting only on first month.

## 2023b – July 11, 2023

### New

Ballpark Location:

Drag-and-drop utility to create or update a location (.loc) file.

Comparison Report:

Numerical and graphical representation of actual vs replay batting avg and ERA.

Lists players, and can compare teams.

### **Updates**

Collect Data From Box Scores:

Added Triple Plays, Walk-off HR's, and ability to report on more than one stat.

Pitchers From Box Scores and Starter Schedule Report:

Fixed date display issues for games played before 1900.

Pitchers From Box Scores:

Added option to display innings pitched for each pitcher.

Modified toolbar to provide more screen space.

Added Zoom Out and Zoom In to toolbar.

### **2023a – March 9, 2023**

#### **New**

Who Is Hot, Who Is Not:

Display a team's stats by date range, x amount of recent games, or all games by reading box scores. All stat columns are selectable and sortable.

Cleanup Folders:

Helps you identify, and remove, files you no longer need from certain game folders. It will never modify the original folder.

#### **Updates**

Active Roster Positions + *Minors*:

Renamed from Active Roster Positions. Now includes players in minors.

Box Score:

Added selection Scoresheet to What to Display.

Collect Data From Box Scores:

Added collections for Batting Cycles, No-Hitters collection (which will also display multi-pitcher no-hitters), Shutouts, Time, and the following:

x or less hits by a team

x or more runs by a team

x or hits by a team

x or more inning games

x or more runs by a player

x or more hits by a batter

x or more HRs by a batter

x or more RBIs by a batter

x or more Ks by a pitcher

x or more SB's by a player

where x is a value you to enter.

Added field to collect data for a specific team.

Added box score date range search.

Clarified outputs on all collections.

#### Starting Pitchers Rest:

Renamed from Starting Pitching Days Rest From CM (under Commissioner Tools).

No longer requires Super HAL Report.

Fixed certain game counts.

Can check both Days and Games rest.

#### Starter Schedule Report:

Renamed from Starting Pitchers From CM (under Miscellaneous).

No longer requires Super HAL Report.

There is now a checkbox, on the main page, that allows you to turn on or off checking the default search when selecting a folder.

Reduced left and top margins for displayed output.

Prints no longer display Go to Top of Page, etc. And, in general, have better formatting.

Much improved Help Guide, with table of contents, screenshots, and examples too.

Fixed a few quirky items that impacted mostly new users.

## 2022a – February 23, 2022

### New

#### Active Roster Positions:

List a team's active players by position.

#### Build Game Record Book:

Build a game record book, with over 70 stats, by reading box scores.

#### Collect Data From PAC Files:

Collect dice roll and split info (added GD imaging extension).

#### Display Lineups:

Display small lineup card from the lup file.

#### Display Transactions Plus:

Display player's full name. Choose transactions to display. Also by team.

#### Player W-L Count When Starting:

Display team W-L record for starting players at each position.

#### Remove Formatting From PRT Files

Removes formatting ([0], [1], etc.) from PRT files in a folder.

#### Search PAC Files:

Search PAC files for specific text.

### Updates

#### Adjust Roster Stats:

Added AB+BB option.

#### Box Score:

Removed the inputs for Box Score #2, #3, and #4. 1-20 box scores can be loaded using one input box. This also fixed a file sorting issue.

Fixed error with D-Rays games (due to dash in name).

#### Collect Data From Box Scores:

Added Team RISP collection.

Added player lists for Injuries and Web Gems.

Added sorting capabilities for all collections.

#### Games Not Played and Played:

Replaced List Games Not Played utility.

Now have five options to collect not played and played games.

#### Pitchers From Box Scores:

Completely revamped to calculate rest based on many options.

For many utilities updated displays for easier reading.

When searching for a folder, the search will start at "C:\Strat-O-Matic Baseball".

You can now set a default folder search.

### **2020a – September 22, 2020**

Program now works under Windows 10 v2004

#### Change Schedule Order:

New utility to re-sort an existing schedule

#### Collect Data From Box Scores:

New and replaces Get Injuries From Box Scores

Can collect Attendance, Weather, Injuries, and Web Gems

#### Update Standings Report:

New utility to update an existing standings report

#### Starting Pitchers From CM:

Will not fail if HAL report has no pitchers

#### Games Not Played:

Now saves Start and End Month

### **2019a – May 20, 2019**

#### Games Not Played:

Now displays a non-played doubleheader game

Ability to display or hide date range on output

#### Search Box Scores:

Fixed error with apostrophe in name

### 2018a – March 19, 2018

Compare PAC to PBP:

Added many extra PBP checks and handling of more odd plays

Now accounts for the possibility of the PBP being written before the PAC

Games Not Played:

Added start and end dates to output

Added “None” to output if no games found

Added commonly used fonts and font size choices

Pitchers From Box Scores:

When selecting teams to process, removed Actual Record text

Starting Pitchers From CM:

Added ability to process entire league, not just one team

Injuries From Box Scores:

Added injury count by month

Added game date in injury list

Search Box Scores:

Corrected file count

Now display instances

Added file line number to output table

Search PBP Files:

Corrected file count

Now displays instances

Added file line number to output table

All Utilities:

Added additional checks for folders not found

Note 1: Font choice was only added to Games Not Played since most of the other utilities require a monospace font to correctly align output data.

Note 2: SOM Baseball Utilities is no longer supported for Windows XP and Vista.
